```

tugas ini intinya adalah membuat **routing pada project React menggunakan React Router**, jadi aplikasi yang awalnya masih berupa template Vite akan dibuat menjadi beberapa halaman seperti **Home, Team, dan Contact**. Setiap halaman nantinya punya alamat masing-masing, misalnya / untuk Home, /team untuk Team, dan /contact untuk Contact, lalu dibuat juga navbar supaya pengguna bisa berpindah halaman dengan mudah tanpa harus membuat project baru. Untuk mengerjakannya kita menggunakan react-router-dom, kemudian setelah semua halaman dan tampilannya selesai kita cek apakah routing-nya
